# Tahweel Tech Solutions

Department: Executive | Owner: Tariq Al-Ghamdi | Classification: Internal

## Strategic Growth Vision 2030 Roadmap

## Company Overview

Tahweel Tech Solutions is a Riyadh-headquartered technology company providing secure, sovereign digital infrastructure and AI-powered document intelligence services to public and private sector clients across the Kingdom of Saudi Arabia and the wider GCC region. Founded to support Saudi Vision 2030's digital transformation goals, the company operates four regional offices: Riyadh (headquarters), Jeddah, Dammam, and a satellite office in Dubai.

## 2030 Growth Target

The Board has approved a strategic target of 45% average annual revenue growth through fiscal year 2030, driven primarily by expansion of the sovereign cloud and AI document retrieval product lines. This target was ratified at the Q1 2026 Board meeting and is reviewed quarterly against actual performance by the Executive Committee.

## Strategic Pillars

- Pillar 1 - Sovereign Infrastructure: Expand Azure-hosted, KSA-resident data infrastructure to reduce client dependency on foreign cloud providers.
- Pillar 2 - AI-Powered Document Intelligence: Scale the Retrieval-Augmented Generation (RAG) platform (internally codenamed "Madar") from pilot to full enterprise rollout across all departments.
- Pillar 3 - Regional Expansion: Establish commercial presence in the UAE and Bahrain by end of 2027.
- Pillar 4 - Talent & Localization: Increase Saudi national workforce representation to 65% by 2028 in line with Nitaqat requirements.

## Key Milestones

- 2026: Complete internal rollout of the Madar file-sharing and AI search platform across all seven departments.
- 2027: Achieve ISO 27001 certification and open the Dubai regional office.
- 2028: Reach SAR 120 million in annual recurring revenue.
- 2029: Launch managed sovereign-cloud offering for government sector clients.
- 2030: Achieve regional market leadership in AI-powered enterprise document platforms within the GCC.

## Governance

Progress against the roadmap is reported monthly to the Executive Committee and quarterly to the Board of Directors. Each strategic pillar has a designated executive sponsor accountable for milestone

delivery, budget adherence, and risk escalation.
