Tahweel Tech Solutions

Department: Legal-Compliance | Owner: Abdulaziz Al-Dosari | Classification: Internal

KSA Legal and Regulatory Compliance Framework

Governing Law

All contracts entered into by Tahweel Tech Solutions are governed by the laws of the Kingdom of Saudi Arabia. Any dispute arising from a commercial contract that cannot be resolved through good-faith negotiation within 30 days is referred to arbitration administered by the Saudi Center for Commercial Arbitration (SCCA), seated in Riyadh, with proceedings conducted in Arabic unless otherwise agreed in writing by both parties.

Confidentiality and NDAs

- A signed Non-Disclosure Agreement (NDA) is mandatory before any external vendor, contractor, or client is granted access to company systems, data, or the Madar platform.
- Employee NDAs are executed at the time of hiring and remain in effect for 2 years following termination of employment.
- Any disclosure of client documents processed through the AI retrieval system to a party outside the authorized department is treated as a material breach of confidentiality.

Data Residency and Sovereignty

In line with Saudi data localization requirements for sensitive commercial and government data, all production data - including the Nextcloud file store, the PostgreSQL database, and AI-generated embeddings - must reside on infrastructure located within the Kingdom of Saudi Arabia (Azure KSA regions).

Contract Review Process

All vendor and client contracts exceeding SAR 100,000 in value must be reviewed by the Legal-Compliance department prior to signature. Standard-form NDAs and non-material amendments under SAR 20,000 may be approved directly by the department manager.

Intellectual Property

All source code, documentation, and AI models developed by Tahweel Tech Solutions employees in the course of their employment, including the Madar RAG pipeline and its underlying prompts and retrieval logic, are the exclusive intellectual property of the company.

Regulatory Compliance

- Compliant with the Saudi Personal Data Protection Law (PDPL) for handling of employee and client personal data.
- Compliant with NCA Essential Cybersecurity Controls (ECC-1:2018) as implemented by the IT-Cybersecurity department.

- Compliant with ZATCA e-invoicing regulations as implemented by the Finance department.
